

Scope of life that we build..

Scope ... the word itself gives a true picture of what the company strives to achieve
A dawn, a new era, to Shine, an evolution of the Architectural Engineering
Consultants business into reality of success
Scope Engineering Consultants founded in Dubai, UAE in early 2003
our mission is to give our client a full service & total satisfaction

Our strategy is to give the Clients his money's worth, and much more”
Customer Satisfaction is our focus, and service is our task. We pride
ourselves in delivering happiness to our clients, much to the admiration
of our competitors

We believe it's a company of leaders, whose culture is built on integrity and trust

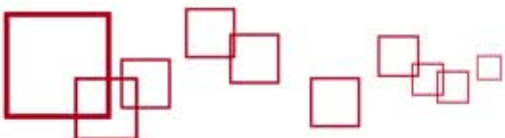

Those that value the power of teams and promote collaboration as a foundational principle, a company that is entrepreneurial and creative, where it is acceptable to take risks and make mistakes

A company that can deliver a powerful designs and philosophy built on the principle ideas + buildings that honor the broader" goals of society

These are the principles that Eng. Somar set in Scope Engineering Consultants that is the reason why we are still in the business of Engineering Consultants after the crisis in UAE

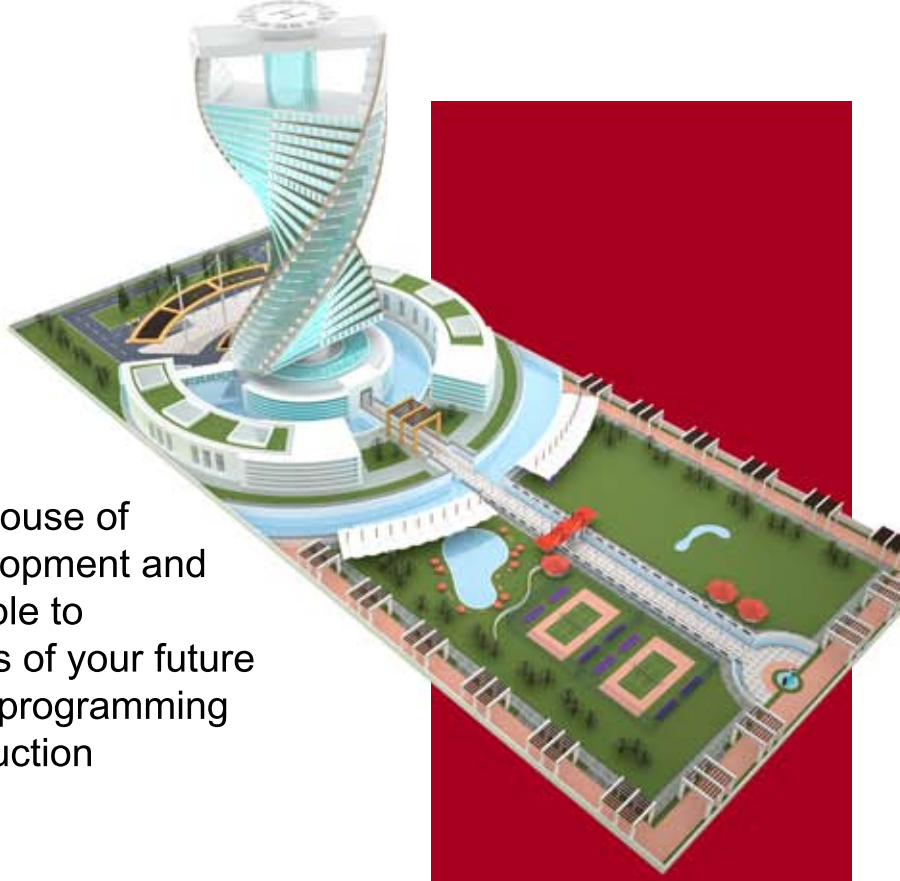

Our designs may address many people many places and many cultures our work speaks to one human being at a time. Our design philosophy distinguishes between buildings that are merely built and buildings that are lived in. With those ideals in mind

we have made a commitment to advancing the way the world designs, builds and uses its buildings. Sustainability plays an essential role in everything we do

Scope of life that we build..

Scope group provides a power house of creativity and expertise in the development and construction process we are available to play a significant role in the success of your future project from conceptual design and programming through administration of the construction
